Key Economic Census Terms

- **NAICS** (North American Industry Classification System)
 - Our primary data dimension
- **Establishments** (vs. Companies, Firms, etc.)
 - Our collection/tabulation level
- **Employers** (vs. Nonemployers)
 - EC only covers employer businesses
- U.S. Code **Title 13 and 26**
 - Protects business privacy

Business.Census.Gov

The screenshot displays the Business.Census.Gov website interface. At the top, the United States Census Bureau logo is on the left, and a search bar is on the right. Below the logo, a navigation bar includes links for Topics (Population, Economy), Geography (Maps, Geographic Data), Library (Infographics, Publications), Data (Tools, Developers), About the Bureau (Research, Surveys), and Newsroom (News, Events, Blogs). The 'Topics' link is circled in red. The main content area features a large orange banner with silhouettes of oil pumps and the headline 'Mining, Quarrying, Oil and Gas Extraction Booming'. Below this, a 'Population Clock' shows U.S. and World population figures. A 'Latest News' section includes articles about a Google Hangout and biking to work. On the right, a sidebar menu lists categories like Population, Economy (circled in red), Business, Education, Employment, Families & Living Arrangements, Health, Housing, Income & Poverty, International Trade, and Public Sector. Under the 'Economy' category, a sub-menu lists 'Economic Census' (circled in red), Economic Indicators, Economic Studies, Industry Statistics Portal, and Other Economic Programs. The footer contains the United States Census Bureau logo and contact information for the U.S. Department of Commerce, Economics and Statistics Administration.

Advance Report

- National-level data at 2- and 3-digit NAICS
- Released on March 26th, 2014

FOR IMMEDIATE RELEASE: WEDNESDAY, MARCH 26, 2014

Mining, Quarrying, Oil and Gas Extraction Booming, According to First Results from the Census Bureau's 2012 Economic Census

From Utilities to Health Care to Manufacturing, Census Bureau Statistics Provide Look at U.S. Economy Since Recession

The mining, quarrying, and oil and gas extraction sector of the economy showed tremendous growth from 2007 to 2012 as the number of establishments rose by 26.4 percent, according to the [2012 Economic Census Advance Report](#) released today by the U.S. Census Bureau.

These results provide the first comprehensive look at the U.S. economy since the 2007 recession. The economic census is the most authoritative and comprehensive source of information about U.S. businesses from the national to the local level. It provides the foundation and benchmark for gross domestic product, monthly retail sales, as well as other indicators of economic performance.

"The economic census is one of the Commerce Department's most valuable data resources," U.S. Secretary of Commerce Penny Pritzker said. "By providing a close-up look at millions of U.S. companies in thousands of industries, the economic census is an important tool that informs policy at the local, state and national level, and helps businesses make critical decisions that drive economic growth and job creation. At the Department of Commerce, one of the top priorities of our 'Open for Business Agenda' is to make our data easier to access and understand so that it can continue enabling startups, moving markets, protecting life and property, and powering both small and large businesses across the country."

2012 Economic Census: Advance Report Snapshot

Selected Preliminary Findings

DID YOU KNOW?

The Health Care sector was not only the largest employer in the U.S. in 2012 (with nearly 18.6 million employees) but this sector also reported the highest annual payroll (\$804.4 billion). The Wholesale Trade sector reported the most sales (\$7.2 trillion), and the Retail Trade sector had the largest number of businesses (nearly 1.1 million establishments).

Employment Statistics in Top 5 Economic Census Sectors in the U.S.: 2012, 2007, & 2002

NAICS Code	NAICS Title	Number of Employees (sector ranking criteria)				Annual Payroll per Employee (\$)			
		2012	2007	2002	Change 2002 - 2012	2012	2007	2002	Change 2002 - 2012
62	Health care and social assistance	18,587,467	16,792,074	15,052,255	3,535,212	\$43,275	\$39,466	\$32,942	10,333
44-45	Retail trade	14,737,687	15,515,396	14,647,675	90,012	\$25,196	\$23,384	\$20,625	4,571
72	Accommodation and food services	12,027,557	11,600,751	10,120,951	1,906,606	\$16,383	\$14,726	\$12,603	3,780
31-33	Manufacturing	11,268,906	13,395,670	14,699,536	-3,430,630	\$52,686	\$45,818	\$39,197	13,489
56	Administrative and support and waste management and remediation services	10,217,859	10,250,955	8,741,854	1,476,005	\$33,826	\$29,407	\$23,615	10,211

Note: All data are expressed in current dollars. Sectors presented are limited to those which are comparable over time; comparisons for other sectors may be impacted by changes to the North American Industry Classification System codes.

New Industries for the 2012 Economic Census

- New and emerging industries
 - Breakout of **solar, wind, geothermal, and biomass electric power generation** from All Other Electric Power Generation (NAICS 221119)
 - Stats:
 - Number of businesses: 673 in 2011 with 9,058 employees (435 in 2007)
 - CA: 106, TX: 53, MN: 50... **NJ: 18**

Industry Changes for the 2012 Economic Census

- Consolidations due to decrease in number of companies due to:
 - General industry decline
 - Company consolidation (mergers and acquisitions)
- Primarily impacts the **manufacturing** sector (178 industries)
- Stats:
 - Steel mills (880 in 2007, 570 in 2011)
 - Machine tools (579 to 626 (cutting type) and 292 to 312 (forming type))

Other Industry Changes

- Changes to (and consolidation of) existing industries due to market change
- Primarily impact the Retail and A&F sectors
- Stats
 - Computer Stores: 12,411 in 2007, 10,292 in 2011
 - Camera Stores: 2,049 to 1,115
 - Music Stores: 4,496 to 2,379

2007 NAICS	2012 NAICS	NAICS Industry Title
	443142	Electronics Stores
443112		<i>Radio, Television, and Other Electronics Stores</i>
443120		<i>Computer and Software Stores</i>
443130		<i>Camera and Photographic Supplies Stores</i>
451220		<i>Prerecorded Tape, Compact Disc, and Record Stores</i>

Introduction to NAICS

The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

NAICS was developed under the auspices of the Office of Management and Budget (OMB), and adopted in 1997 to replace the [Standard Industrial Classification \(SIC\) system](#). It was developed jointly by the [U.S. Economic Classification Policy Committee \(ECPC\)](#), [Statistics Canada](#), and Mexico's [Instituto Nacional de Estadística y Geografía](#), to allow for a high level of comparability in business statistics among the North American countries.

This official U.S. Government Web site provides the latest information on plans for NAICS revisions, as well as access to various NAICS reference files and tools.

The official 2012 U.S. NAICS Manual includes definitions for each industry, background information, tables showing changes between 2007 and 2012, and a comprehensive index. The official 2012 U.S. NAICS Manual is available in print and on CD-ROM from the National Technical Information Service (NTIS) at (800) 553-6847 or (703) 605-6000, or through the [NTIS](#) Web site. Previous versions of the NAICS Manual are available.

Additional information on the background and development of NAICS is available in the [History](#) section of this Web site.

The 2012 Economic Census provides a comprehensive view of the American economy for the first time since the 2007 Census. While the economic census occurs every five years, there is a multitude of other programs that provide limited economic data on a monthly, quarterly, annual, and five year basis. To help you arrive at the data you need we have created the following user guide:

The American FactFinder Help Center

For directions on using American Factfinder, please click on the [graphics](#) link above. To begin searching immediately, please visit our [Finding Data](#) landing page.

Understanding Industry Classification Systems

Learn how we classify businesses and economic output.

Methodology and Disclosure Help Center

Table	Annual	By quarter
(15,000)	(15,000)	(15,000)

The screenshot shows the Economic Census business.census.gov website. The top navigation bar includes links for People, Business, Geography, Data, Research, and Newsroom. The main content area is titled "Economic Census business.census.gov" and features a "Help Center" section. Callouts point to several key areas:

- North American Industrial Classification System & Other Classification Systems:** This section provides information on how the Census Bureau classifies businesses. It includes:
 - Industry Classification:**
 - Sectors
 - Codes Not Covered in the Economic Census
 - Industry Code Updates
 - Classification of Establishments
 - Product Classification:**
 - Product Classification
 - Broad vs Detailed Product Lines
- Methodology & Disclosure:** This section provides information on data collection and protection. It includes:
 - Methodology:**
 - Basis of Reporting
 - Different Methodologies
 - Method of Assigning Tax Status
 - Reliability of Data
 - Who gets a form?
 - Disclosure:**
 - Data Processing and Treatment of Nonresponse
 - Glossary of Disclosure Symbols
 - What is Disclosure?
- The American FactFinder Help Center:** This section provides directions on using American FactFinder, including a link to the "Finding Data" section.
- What Data Tools are Available:** This section provides information on the tools available for finding data.
- Understanding Industry Classification Systems:** This section includes the NAICS logo and a link to learn how businesses and economic output are classified.
- Methodology and Disclosure Help Center:** This section includes a table showing the number of forms sent and received for different types of businesses.
- Understanding Economic Data:** This section includes a table showing the number of forms sent and received for different types of businesses.

Finding Economic Data By Geography

[Print](#) | [Share this page](#) | [Connect with us](#)

The economic programs at Census typically produce data for the following six levels of geography: National, States, Metro Areas, Counties, Places, and ZIP Codes. Some of the programs also produce data additional geographies such as Regions, Divisions, and Commodity Flow Survey Metro Areas. To learn more about each level of geography, please visit the [Geography Help Center](#).

Using the tables below, you will be able to see which of the six main geographic levels are available for each program. In the first table, you will see all economic programs that release data in American FactFinder (AFF). In the second table, you will see all economic programs that release data via their website.

Not sure what a program covers? Simply click the program title to learn more.

Geographic Coverage of the Economic Census and Related Programs in AFF

[FactFinder](#) - geography covered in economic program

The links in the table below will take you to prefilled table. Once in AFF, you can access additional national level data by clicking the [Back to Advanced Search](#) button above the table. To learn more on how to use AFF please visit the [help center](#) or the [AFF user guide](#).

Uses of Census Data

[Print](#) | [Share this page](#) | [Connect with us](#)

The Economic Census provides detailed statistics that are important for industries and communities. Trade associations, chambers of commerce, and businesses rely on this information for economic development, business decisions, and strategic planning. Browse the topics below for information on using these statistics, including sample case studies. Full statistical tables from the Economic Census can be found in [American FactFinder](#).

[See uses of the Economic Census](#)

Compare my business to others

Your Business	Industry Average 2007
2,526,478	3,911,027
132,973	165,495

Business owners and managers can compare the operating data for their business to totals and averages for their industry (such as sales per employee) from the national, state, and even local level to evaluate their current operations. Business owners and managers can also compare the data for their business to businesses in related industries and other industries in their local area.

[See Example](#)

Compare my community to others

Local economic development organizations and chambers of commerce can compare statistics for the industries in their community to identify opportunities for growth. They can also compare statistics for the industries in their community to neighboring communities, their metro area and state, and to national totals to identify market share and trends.

[See Example](#)

Identify business markets

Business owners and managers can analyze information for their customers at the local level to identify unsaturated or emerging/growing markets for their products and for opportunities for expansion.

[See Example](#)

Use data in business plans and loan applications

Entrepreneurs can use statistics from the Economic Census for the industry that they are considering starting a business in or for related industries at the local level in their business plans. They can also use this information in loan applications to local business lenders and in government business development agencies to validate the potential market they are considering entering.
